

NOTIFICATION PURSUANT TO
SECTION 6 OF DSHEA

1203 '99 SEP -7 PM 40

In compliance with Section 6 of the Dietary Supplement Health Education Act (DSHEA) and Rule 21 C.F.R. 101.93, this Notification is filed on behalf of the following manufacturer of **Schiff® Product Reference Pamphlet S-36/5M/699** bearing the statements set out below:

Weider Nutrition International., Inc.
2002 South 5070 West
Salt Lake City, Utah 84104

The text of each structure function claim for **Vitamin A, Beta-Carotene, Dehydroepiandrosterone (DHEA), Grape Seed Extract, Garlic Oil, Soy Lecithin, Magnesium, Biotin, Pantothenic Acid, Choline & Inositol** is as follows:

- (Statement 1) Vitamin A has many important functions in the human body including the health and maintenance of the eyes, skin, bones and even the immune system.
- (Statement 2) Beta carotene is an important antioxidant nutrient. Beta carotene nutritionally supports healthy heart function of cardiovascular and immune systems by protecting against cellular damage.
- (Statement 3) Supplementing DHEA may have multiple health benefits and assist in balancing body systems. DHEA, which is the precursor to many other hormones including testosterone and estrogen.
- (Statement 4) Proanthocyanidins are phytonutrients (plant-based); these botanical antioxidants may have numerous health benefits and are part of a healthy diet.
- (Statement 5) Garlic oil, rich in dialk(en)yl sulfides, helps maintain well-being of cardiovascular and immune systems by multiple factors such as supporting healthy platelet function and having antioxidant activity.
- (Statement 6) Choline and inositol are known as lipotropic agents because of their ability to emulsify fat. Lecithin is a natural emulsifier that works to 'disperse fats in the body.
- (Statement 8) Magnesium: Energy metabolism. Muscle contraction. Nerve conduction. Lipid, protein and urea synthesis.
- (Statement 9) Magnesium is required for activity of over 300 enzymes, stabilization of high-energy compounds (ATP and Creatine

Phosphate), stabilization of cell membrane phospholipids, stabilization of nucleic acids (DNA and RNA), protein synthesis, amino acid metabolism, proper utilization of calcium and activity of some hormones. Schiff's Calcium-Magnesium is in its chelated form which is absorbed well and generally better tolerated.

I, Luke R. Bucci, Ph.D., CCN, CNS, Vice President of Research at Weider Nutrition International, Inc. am authorized to certify this Notification of behalf of the Company. I certify that the information presented and contained in this Notification is complete and accurate and that the Office of Regulatory Affairs at Weider Nutrition International, Inc. has substantiation that each statement is truthful and not misleading.

DATED this 16th day of August, 1999.

WEIDER NUTRITION INTERNATIONAL, INC.
